

Bridge Light

SL-BR

Optional

Also available with optional solar/battery systems and optional mounting accessories

The Sealite Advantage

- Up to 4NM visible range
- IR programmable (VDC Model only)
- Able to operate in conjunction with existing power supplies
- Optional solar/battery systems available
- Optional universal AC: will accept between 110-240VAC
- Optional mounting accessories

Sectored Bridge Light

The SL-BR is an LED Bridge Light specifically designed to clearly mark bridges and structures extending over navigable waterways and is used extensively throughout the USA. The SL-BR has been designed to offer superior visibility with up to 4NM visible range, and operates in conjunction with existing power supplies.

The light is available as a 180° sectored red model or 360° green model and comes fixed-on as standard. The fixtures are also available with a range of factory-set flash characteristics and sectoring requirements to suit local regulations.

The light is available in two configurations, nominal 12VDC or universal AC (110-240VAC).

The 12VDC model may be provided with an IR programmer for added functionality. Programmable features include; intensity adjustment, flash code adjustment, battery diagnostics and ON/OFF lux setting adjustment.

The SL-BR can also be supplied as a complete solar/battery system to comply with requirements of regional governing bodies such as the U.S. Coast Guard, or the IALA Recommendations for the marking of fixed bridges over navigable waters.

Sealite has a range of other short, medium and long range marine lanterns that may also be used to comply with bridge lighting requirements.
