tablet control of Wireless Airfield Lighting

AvMesh® USB Device

for tablet control of Wireless Airfield Lighting

The AvMesh® USB device can be used with tablet computers* operating Windows 8.1 or greater, and enables wireless control of Avlite airfield or helipad lights over a 2.4GHz mesh network.

The proprietary Avlite tablet interface provides an intuitive and easy to use platform, which gives operators full control over a host of command and configuration messages.

Main Dashboard

• Immediately turn all lights ON or OFF directly from the main dashboard
• Access advanced command pages & diagnostics

Supports Multiple Languages

From the main dashboard, users can select between multiple languages including;

• English
• Spanish
• German
• Chinese

AvMesh® USB Device
for tablet control of Wireless Airfield Lighting

Advanced Airfield Control

Quickly set advanced features from a single screen, including;

- Operation mode
- Light switching between Visible & IR
- Light Intensity
- Timeout duration
- Light grouping

Available pre-configured, or as a USB device only

The AvMesh® USB device is available on its own, or pre-configured to a tablet computer with ruggedized case, to allow customers to immediately begin using the system.

- Available as USB device only, and shipped with tablet software for user configuration on their own devices
- Available pre-configured to tablet computer and ready to use

* Tablet computer must use Windows 8.1 operating system or later, and include USB port. Contact Avlite to confirm suitability.
