

Runway End Identifier Light

AV-REIL

The **AV-REIL** is a selfcontained runway end light operable via AC or solar power. The REIL system consists of two flashing light fixtures to easily identify the end of the runway. One fixture is positioned at each corner of the runway landing threshold.

Key Features:

- Multiple Power Options
- Integrated Battery System
- Complies with FAA photometrics

Power Options

Depending upon your requirements, the REIL can be configured with the following power options:

- AC
- AC/Battery Backup
- AC/Battery Backup with Solar

Integrated Battery System

The main chassis contains a user-replaceable battery, and can easily add on a solar system option to increase the battery life.

Applications

- Portable for expeditionary, tactical, or temporary/ semi-permanent use
- IR or NVG mode option for covert operations

Runway End Identifier Light

AV-REIL

Light Source	LED
Available Colors	White
Intensity Adjustments	5 step intensity
Operating Time at Maximum Intensity	4 hours
LED Life Expectancy (hours)	>100,000
Electrical Characteristics	
Circuit Protection	Integrated
Operating Input Voltage	90-264VAC 50/60 Hz
Temperature Range	-40 to 122°F / -40 to 55°C
Solar Characteristics	
Solar Module Type	Monocrystalline
Output (Watts)	100 (1 x 100W)
Charging Regulation	МРРТ
Power Supply	
Battery Type	Absorbent Glass Mat (AGM)
Battery Capacity (Ah)	25
Nominal Voltage (V)	12
Charger	Integrated
Rated Power	45 W
Input Voltage	90-264VAC 50/60 Hz
Physical Characteristics	
Body Material	Painted steel and aluminum
Body Material Lens Material	Painted steel and aluminum Acrylic
Lens Material	Acrylic
Lens Material Lens Design	Acrylic Multi-LED optic
Lens Material Lens Design Mounting	Acrylic Multi-LED optic 2 through-holes with a 200mm circle
