

LIGHTWEIGHT JUNIOR LIFEJACKET

The first junior lifejacket developed in the Kru range, the XF Junior is ideal for children weighing 15-40kg. Safety is the key criteria for the XF Junior lifejacket, however comfort is also of high priority. The XF Junior adjustment system offers an excellent fit, allowing the wearer good flexibility.

The XF Junior comes in automatic version only which means that the lifejacket will inflate on water entry but there is also a manual override handle in the unlikely case of an emergency.

XFJUNIOR
