

DETECTING THE INVISIBLE

CHAMELEON[®]
DETECTING THE INVISIBLE™

First Responders and military personnel deal with dangerous situations every day. In the face of chemical threats, minutes may make the difference between life and death.

The Chameleon makes chemical detection easy.

Just put on the armband and you're ready to go.

The Chameleon is the most innovative toxic chemical detection device on the market today!

The Chameleon easily attaches to the forearm for hands-free detection of gases and vapors in air - no need for a liquid sample.

The Chameleon armband is designed for easy on/off to fit any forearm; even over turn-out gear. It can be used for one cassette or as many as ten. The pre-configured kits (Chemical Suicide, Clan-Meth Lab Detection, Fire Investigator Safety, and HazMat kits) will take the guess work out of your chemical detection. Just grab one pouch from your kit, load all included cassettes and you are ready to go. With the greatest variety of cassettes, the HazMat Detection Kit can be utilized in a multitude of HazMat situations.

Chemical detection has never been easier. If half of the viewing window changes color - the chemical is present; it really is that simple. No power, no calibration.
